

9.5 SITE SECURITY

This is the section of the technical review in which the permit writer reviews the permit application for the adequacy of the security system. Security is required to reasonably minimize accidental and non-accidental exposure to the hazards of all hazardous waste management units.

KEY QUESTIONS

Are there passive information devices (signs, markings, etc.) that sufficiently identify every hazardous waste management unit (storage area, filter presses, clarifiers, etc.)? Do these signs mention that hazardous waste is being managed in these units?

Are there passive information devices (signs, markings, etc.) that adequately provide sufficient safety information at every hazardous waste management area (required safety equipment, no smoking, load limits, etc.)? Do markings (lines on pavement, color schemes, etc.) provide enough delineation of safe and unsafe areas?

Are there passive information devices (signs, markings, etc.) that adequately provide sufficient information concerning material characteristics required by local fire-fighting and emergency response crews?

Are there enough passive barrier devices (natural barriers, cliffs, fences, gates, locking mechanisms, etc.) to minimize accidental access to unauthorized individuals?

Are there enough passive barrier devices (natural barriers, cliffs, fences, gates, locking mechanisms, etc.) to reasonably minimize any accidental access to local livestock, wildlife, flora and fauna (birds, dogs, cats, local wildlife, farm crops exposure, etc.)?

Are there enough passive and/or active surveillance devices (surveillance cameras, security guards, etc.) to reasonably detect and minimize entrance from determined individuals (vandals, thieves, etc.) into the hazardous waste management areas? Will these devices be sufficiently functional 24 hours a day, seven days a week?

REQUIRED OUTPUTS

APPLICABLE REGULATIONS AND STATUTES

State Laws and Regulations:

Title 22, Cal. Code of Regs., Div. 4.5

CHAPTER 14: STANDARDS FOR OWNERS AND OPERATORS OF HAZARDOUS WASTE
TRANSFER, TREATMENT, STORAGE, AND DISPOSAL FACILITIES

Article 2: General Facility Standards

Section
